EDUCATION

MS Computer Security
EPITA, Paris, France
2022 – 2025

B.Tech Computer Science
SMVEC, Tamil Nadu, India
2018 – 2022

TECHNICAL SKILLS

Offensive Security
- Penetration Testing · VAPT
- Burp Suite · Nmap · Metasploit
- Kali Linux · OWASP Top 10

Defensive / SOC
- Wazuh SIEM / XDR · Splunk
- MITRE ATT&CK
- Wireshark · auditd
- Incident Response

Dev & Tools
- Python · Bash
- Docker · Kubernetes · eBPF
- Linux · Git · Cryptography

Forensics
- DFIR · Disk Imaging
- Log Investigation
- Timeline Analysis

CERTIFICATIONS

- CompTIA Security+ (In Progress)
- CCNA (In Progress)
- TryHackMe AI Security (In Progress)

LANGUAGES

- English — Professional
- French — Conversational
- Tamil — Native

SUMMARY

MS Computer Security graduate (EPITA, Paris) with hands-on experience in VAPT, SOC operations, digital forensics, and eBPF-based threat detection. Interned at Orange Innovation, Paris — built the BPFroid Android malware detection framework. Actively building SOC home labs, antivirus simulations, and AI security skills. Seeking SOC Analyst or Penetration Tester roles.

EXPERIENCE

Security Policy Developer – eBPF | Orange Innovation, Paris

- Researched eBPF integration in Android mobile security; analysed OS-level behaviours and identified patterns for credential risk detection.
- Designed and implemented BPFroid — a prototype Android malware detection framework using eBPF for OS-level security monitoring.
- Evaluated security features across mobile operating systems and documented findings for the Data Privacy & Innovation team.
- Produced structured security policy documentation covering eBPF use cases, risk analysis, and defence recommendations.

CURRENT PROJECTS

01. MyAV — *Antivirus Simulation*
Python · VirusTotal API · Heuristic Analysis · GUI Dashboard

02. Honeypot & ATT&CK Lab — *SOC Home Lab*
Wazuh SIEM · Cowrie Honeypot · MITRE ATT&CK · auditd · Ubuntu

03. Wazuh Detection Lab — *Threat Detection*
Wazuh · SIEM · XDR · Incident Response · Log Analysis

04. eBPF Threat Atlas — *Kernel Security*
eBPF · Linux Kernel · Kubernetes · Cloud-Native · CVE Research

05. TryHackMe AI Security — *Learning Path*
AI Security · Prompt Injection · Adversarial ML · TryHackMe

ACADEMIC PROJECTS

01. Password Cracking Tool — *Master's Project*
Kubernetes · Docker · bcrypt · Python · Multiprocessing

02. Incident Response — Hardware Dump — *Digital Forensics*
Kali Linux · DFIR · Disk Imaging · Timeline Analysis

03. Web Application Security Audit — *Web Security*
Kali Linux · CWE · OWASP Top 10 · VAPT

04. Software & Database Audit — *Audit*
Kali Linux · CWE · Database Security · Auditing

05. Password Manager Tool — *Cryptography*
Python · Cryptography · Fernet · Salting

GITHUB SECURITY PROJECTS

- **Docker Pentest Report** | 10 Docker challenges; structured pentests on DVWA with severity-rated documentation.
- **VAPT** | Port/service enumeration, OS discovery, multi-layer vulnerability scanning, full findings report.
- **Web-Based VAPT** | IDOR, XSS → JWT token theft, API flaws — OWASP Top 10 coverage with privilege escalation testing.

CTF WRITE-UPS — MEDIUM

- **Billing – TryHackMe** · Linux · SUID Privilege Escalation
- **Disgruntled – Linux Forensic Investigation** · Insider Threat · Log Analysis
- **Pickle Rick – TryHackMe** · Web Exploitation · Command Injection
- **Deja Vu – TryHackMe** · OSINT · Reverse Image Search · Geolocation
